GIS Consulting

When GIS Performance Matters!

GIS Consulting Benefits
- Quality
- Performance
- Experience
- Results

Geer Services, Inc. provides a wide variety of consulting and implementation services to enhance your organization's productivity and efficiency through the use of a Geographic Information Systems or (GIS). Our company has the experience and know-how to create new GIS systems or improve the overall performance of your existing system.
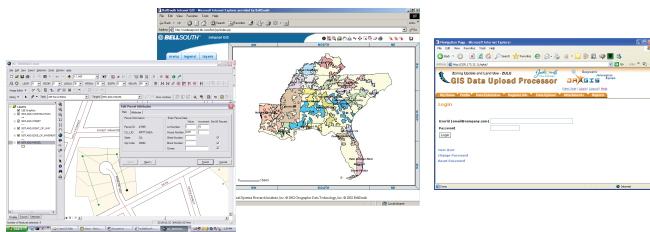

Geer Services was established as a result of the successful track record of our team in the implementation of geographic information systems over the years in the telecommunications industry. Members of the Geer Services team have been providing business solutions using GIS technology for the past 14 years.

Our consulting practice focuses on the successful implementation of web enabled GIS products for our customers. Geer Services has the unique ability to apply GIS and database technical solutions to solve your most critical business needs. Your business data is an important asset and it must be accurate when used to make critical business decisions. The practical experience and expertise of the Geer Services team can turn your dysfunctional data into a goldmine.

Our services are available to all sizes of commercial businesses, GIS companies and local, State and Federal Government entities. Other services that we offer include graphic design, web development and web hosting expertise to enhance your company's image and generate a professional and productive web presence.
